

CHRONO-ART DECORATOR CLOCK INSTRUCTIONS
(For people who love instructions)

Chrono-Art is a quality item and a precision time-piece. Reading these instructions will increase your fun and enjoyment of it.

HOW TO TELL THE TIME

- A. The time is indicated by groups of lamps.

The sum of the lamps lit is the time. For example:

If four hour lamps,	4:00
two ten minute lamps,	20
the five minute lamp,	5
and three minute lamps are lit,	3
the time is	<u>4:28</u>

The lamp colors were chosen for artistic purposes. The five minute lamp is the only one where the color was used to distinguish it from the others in the group.

- B. There are several approaches for building speed and accuracy in reading the time
1. You can stay up all night for several nights until you have memorized the color patterns. If you do not have a photographic memory this could be a laborious process.
 2. You can count the dots. After several days you will begin to automatically recognize the time patterns.
 3. You can read footnote (7).

HAS TELLING THE TIME BECOME A DRAG ?
